

Tandem Safety Dog Technology

Breanna B. Yuqi P. Oliver L. Jeremiah M.

The Problem

Dogs are injuring their paws
on the pavement
Pet Parents don't know
when the pavement
temperature changes
throughout the day

Solution

Via our smart leash pet parents able to detect when the pavement temperatures increase while walking their pet additionally including a humidity sensor.

Competitors

Image.

Other leashes are basic and don't notify you whether the pavement temperature increase or the humidity that could hinder the animals regulation on heat through panting.

Let's learn about Mercury

Mercury is the closest planet to the Sun and the smallest one in the Solar System. This planet's name has nothing to do with the liquid metal, since Mercury was named after the Roman messenger god. Its surface is quite similar to that of Earth's Moon, which means there are a lot of craters and plains. Speaking of craters, many of them were named after artists or authors who made significant contributions to their respective fields.

Let's take a look at Venus

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot—even hotter than Mercury—and its atmosphere is extremely poisonous. It's the second-brightest natural object in the night sky after the Moon.

Market Value

The beginning

This is Mercury

Mercury is the closest planet to the Sun and the smallest of them all

This is Venus

Venus has a beautiful name and is the second planet from the Sun

This is Earth

Earth is the third planet from the Sun and the only one that harbors life

This is Mars

Despite being red, Mars is actually a cold place. It is made of basalt

This is Jupiter
